

# STOCKHOLM

## Product Information & Data Sheet

Stockholm is a dimensional style natural granite thin veneer with nonstandard heights. Most of our dimensional or sawed height stones are 2.25", 5", and 7.75", but Stockholm is 5", 6", and 11.5". The larger heights still allow for the pieces to line up neatly with the 5" and 6" pieces stacked on top of each other with a half-inch mortar joint between the pieces to equal the 11.5". The larger heights install quicker and are great for large-scale projects with the old adage being the size of the individual pieces should be on par with the size of the project.
