

# SEASIDE

## Product Information & Data Sheet

Seaside is a tumbled natural granite that we cut into thin stone veneer. The stone itself has darker blue and grey undertones with softer off-white tones brought out by the tumbling process. The color variation makes Seaside a perfect fit for tumbling as it brings out the beautiful depth of color in the natural stone. Although tumbling the stone is a labor-intensive process and decreases yield, the beauty and softness it adds to the stone are undeniable. Tumbling stone is also called antiquing as it gives the stone a centuries-old look and feel. Seaside is a classic, elegant, and neutral stone choice in the ashlar style.

### Flats Dimensions

Heights: 2" - 8"  
Lengths: 4" - 18"  
Depths: ¾" - 1½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Grey Tones, Natural Tones, Sky Tones  
Style: Ashlar  
Finish: Tumbled

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
