

LARSON

Product Information & Data Sheet

Larson is a tumbled natural granite thin veneer in the castle rock style. Castle rock stone is defined by its larger rectangular pieces of stone. Some of our stones split very clean to make consistent rectangles, whereas, Larson splits more unevenly to make unique and beautiful pieces. Even though Larson is split in the same way as our other castle rock options, the stone ultimately breaks where it wants to. The unique breakage lines are due to the veins within the stone and bring some irregularity to the individual pieces. The uneven and irregular rectangles as well as the tumbled finish add rustic beauty and old-world charm to Larson. Larson is a new, unique, and rare product as it is uncommon to tumble granite.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Sky Tones
Style: Castle Rock
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
