

TIMMINS

Product Information & Data Sheet

Timmins natural stone veneer is a beautiful fieldledge style granite. The stone has grey and sky tones and shows both the interior split face part of the stone and exterior bedfaces. The stones in Timmins have unique shapes and sizes typical of the fieldledge style that are eye-catching when installed. Due to the size restraints of the mock-up, the product photo does not do this stone justice. The application photo shows the beauty of the stone installed. The mason used a lighter lime color mortar joint as opposed to the standard grey. The mortar color changes the feel of the installed stone with the grey tones in the stone popping against the mortar.

Flats Dimensions

Heights: 2" - 10"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Grey Tones, Sky Tones
Style: Fieldledge
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
