

MONT BLANC

Product Information & Data Sheet

Mont Blanc is a white and grey natural thin stone veneer. The stone is 100% split face showing the interior part of the natural stone slabs. Split face products are created by breaking the stones with a 300-ton hydraulic press. Mont Blanc falls loosely into the ashlar style but is referred to as a strip product within with stone industry. The reference comes from the naturally uniform layers within the quarry. There is not enough height variation from the uniform layers to do a typical ashlar pattern where the size differences in the pieces break up the rows. Therefore, when Mont Blanc is installed, there are strips across the wall similar to a brick pattern or what can also be called course heights.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
