

JURA

Product Information & Data Sheet

Jura is a mosaic style thin limestone veneer comprised of random shaped pieces. The stone has natural color variation just as nature intended. The veneer shows the colors exactly as they come out of the ground. Jura is reminiscent of old-world masonry before the time of hydraulic presses and diamond saws. Masons had to work with the stone they had; it is awe-inspiring to see the finished stonework from centuries ago. Jura can be blended and goes well with a few of our other natural stone veneer options if you are looking for a more linear design. As shown in the application photo, a designer recently blended our Balkan product with Jura to create a custom fieldledge style with Jura's colors. Our sales team is happy to work with you to create a custom blend.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 4" - 12"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones
Style: Mosaic
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
