

BLUE RIDGE

Product Information & Data Sheet

Blue Ridge is a natural low height ledgerstone thin veneer. The veneer is unaltered except for the sawn back to create the thin stone; the tops and bottoms of the stone are completely natural. The small heights come from the naturally occurring thin layers within the quarry. The stone is quarried in sheets that are typically 1-3" thick with an occasional thicker sheet. The sheets are then split with a hydraulic press making the strips of ledgerstone for Blue Ridge. Blue Ridge primarily shows the interior part of the stone from the splitting process but also incorporates the edges of the sheets. The edges provide the brown and tan pieces to the veneer just as they do on the quarry ledge.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones, Sky Tones
Style: Ledgerstone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
