

GRAPHITE

Product Information & Data Sheet

Graphite is an eye-catching black and grey ashlar real limestone veneer. The stone is a mix of the different faces of the natural stone that all come from the same quarry. Graphite has both lighter and darker splitface pieces showing some horizontal veining within the stone. The neutral greys are offset by the larger rectangular or blocky bedface pieces. The bedfaces which are cut from the tops and bottoms of the natural limestone slabs show the unique black natural mineral staining in varying amounts. The black coloring only comes from a small portion of the quarry with the rest of the stone in the quarry being a standard grey.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
