

WYNDEMERE

Product Information & Data Sheet

Wyndemere is a colorful castle rock style real quartzite thin stone veneer. The abundance of color comes from the variations in the mineral composition between the layers of stone. Wyndemere showcases grays, whites, tans, golds, and hints of red. The stone is subject to greater natural variation than most of our other stone offerings due to the abundance of color.

Wyndemere is a split or natural back product. The layers of the stone used to create Wyndemere are naturally 1" thick which allows the stone to be split as opposed to sawn. The split back has no impact on the installation or appearance.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Copper Tones, Gold Tones, Grey Tones, Natural Tones
Style: Castle Rock
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
