WELLESLEY

Product Information & Data Sheet

Wellesley is a sawed height natural granite thin stone veneer. The individual pieces of Wellesley have been sawn on five sides with a split face on the front. The split face or engineered break retains the natural granite texture. The stone has the characteristic sparkle of natural granite which can make the color can appear to vary depending on ambient lighting. Wellesley is sawed to two heights (six inches and four inches) and is unique in that it is the only granite dimensional ledgestone we offer. The stone is shown with an off-set drystack installation, however, it can also be installed in rows or with a mortar joint between the stone in a running bond pattern.

Flats Dimensions

Heights: 1" - 6" Lengths: 4" - 12" Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Grey Tones

Style: Dimensional Ledgestone Finish: Natural

Lengths: 3"-5" x 8"-12" Depths: $\frac{3}{4}'' - 1 - \frac{1}{2}''$

Corner Dimensions

Heights: 1" - 6"

Weight: 20 lb. per linear foot

Angle:

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

\$\tag{\text{https://quarrymill.com/shop/wellesley/}}

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.
