

# HILLCREST

## Product Information & Data Sheet

Hillcrest is a castle rock or square-rec style natural sandstone veneer in neutral tones. The thin stone exclusively shows the bedface which is the tops and bottoms of the sandstone slabs. Hillcrest has an understated amount of color. The variation in Hillcrest comes from the differences in how the minerals settled between the layers of stone. The stone is primarily grey and white with a range of tones within the two colors. The greys can have hints of green and the whites can have hints of browns and golds. Overall, Hillcrest provides subtle color variation without being too loud or busy. This a split back product. The split back will not have any impact on the installation or final appearance.

---

### Flats Dimensions

Heights: 2" - 12"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones  
Style: Castle Rock  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
