

TEMPE

Product Information & Data Sheet

Tempe is a red and lavender natural thin sandstone veneer. The natural sandstone has beautiful dark veining and movement within the stone as the veining can appear to be flowing on the wall. Tempe is cut into consistent panels for easy installation. The standard size of the panels is 12" x 24" with a thickness of 1". The panel size can be custom-cut to fit your design needs or a mix of different sizes can be cut for an additional cost. Our popular Manchester stone is produced similarly to Tempe. The application photos of Manchester can provide an idea of the design possibilities in regard to the panel sizes. L-shaped corners are also available via special order. This stone may have an extended lead time.

Flats Dimensions

Heights: 2- $\frac{1}{4}$ ", 5", 7- $\frac{3}{4}$ "

Lengths: 4" - 16"

Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Copper Tones

Style: Dimensional

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
