

MESA

Product Information & Data Sheet

Mesa natural thin stone veneer is a blend of splitface and bedface sandstone with the recognizable red and copper tones from the American Southwest. The individual pieces of stone are all cut from the same slabs of red sandstone. The longer linear pieces are the splitface which are broken with a hydraulic press. This process is also referred to as snapped or chopped in the stone industry. The splitface pieces show some linear veining within the stone. The larger castle rock style blocky pieces are the bedface. The bedface pieces show the tops and bottoms of the sandstone slabs that are split on all four sides to create the rectangles.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
