

CHANDLER

Product Information & Data Sheet

Chandler is a fieldledge style real thin sandstone veneer with a tumbled finish. The stone combines irregular and linear pieces cut from different parts of the sandstone slabs. The stone is extracted from the ground in slabs or sheets of varying thicknesses. The irregular pieces of Chandler come from the tops and bottoms of the sheets, whereas, the linear pieces are cut from the edges. The edge pieces can have some unique colors and textures as they are exposed to the elements through cracks or fissures within the ground. If you were to walk through a canyon, the stone walls you see are exposed edges.

Flats Dimensions

Heights: 2" - 10"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Copper Tones, Grey Tones

Style: Fieldledge

Finish: Tumbled

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
