

KIPS BAY

Product Information & Data Sheet

Kips Bay is clean cut natural dimensional ledgestone veneer with beautiful neutral tones of beige, gold, and light brown. The individual pieces of sandstone are sawn on all four sides and complement modern design well. Kips Bay is a mix between the dimensional and dimensional ledgestone styles due to the larger four-inch and six-inch heights of the pieces. The stone can be installed by alternating the sizes as shown in our mock-up. It can also be installed in a running bond or brick pattern. In a running bond installation, your mason will install one row with all four-inch heights and the next row with all six-inch heights and repeat. This a split back product. The split back will not have any impact on the installation or final appearance.

Flats Dimensions

Heights: 1" - 6"

Lengths: 4" - 12"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 6"

Style: Dimensional

Ledgestone

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
