

REDWOOD

Product Information & Data Sheet

Redwood is a tumbled castle rock style real sandstone veneer that is sought after for its soft and neutral tones. The stone is prominently beige with some copper undertones giving the finished wall a sense of warmth. The tumbled finish provides an aged look as well as further adds to the soft and pleasing appearance of the stone. Although the stone appears soft, it is an extremely hard and dense sandstone. Redwood is aptly named as the stone has some unique textures and occasional swirling. The stone pieces are roughly rectangular and have been split on all four sides with a hydraulic press prior to the tumbling process.

Flats Dimensions

Heights: 2" - 12"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Copper Tones, Gold Tones

Style: Castle Rock

Finish: Tumbled

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
