

OTTAWA

Product Information & Data Sheet

Ottawa is a unique splitface quartzite natural thin stone veneer. Splitface quartzite is extremely unique and rare, in fact, we are one of only a couple of quarries that offer such a product. The reason quartzite is rarely available in the splitface style is due to the hardness of the stone. Even with 300 tons of pressure, the hydraulic press struggles to break the natural quartzite that makes Ottawa. Ottawa measures approximately seven on the Mohs Hardness Scale. To put the hardness rating into perspective, Ottawa is just above the hardness of a steel nail and will scratch window glass. Creating the splitface exposes the interior of the quartzite slabs. The interior brings out the raw color of the stone, showcases some veining, and has an almost glassy appearance.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Ledge stone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
