

CONWAY

Product Information & Data Sheet

Conway is a natural tumbled quartzite thin veneer in the low height ledgestone style. The stone is unique as it is the only quartzite we tumble. Quartzite is an incredibly hard stone and takes twice as long in the tumbler compared to most other tumbled stones. The quartzite Conway is created from is incredibly hard and measures approximately seven on the Mohs Hardness Scale. To put the hardness rating into perspective, Conway is just above the hardness of a steel nail and will scratch window glass. Conway is cut from the edges of the natural stone slabs. If you were to walk through a canyon, the exposed walls are similar to the stone that gets cut into Conway.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones
Style: Ledgestone
Finish: Tumbled

Packaging

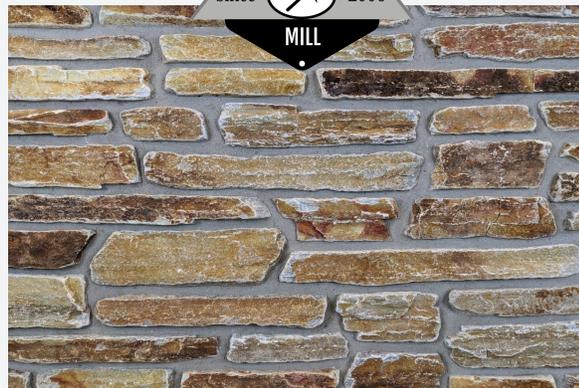

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
