

VALENCIA

Product Information & Data Sheet

Valencia is a weathered edge thin cut natural limestone veneer. The term weathered edge refers to the location the stone is cut from. Valencia is cut from the edges of the natural stone slabs that were exposed to the elements. This exposure comes from cracks or fissures in the ground where rainwater washes through the cracks carrying minerals. The minerals give the stone color and texture over millennia. Valencia is produced from the top few layers of the quarry because the fissures don't penetrate deep into the ground. The cracks or fissures can also be referred to as seams in the quarry which is why this type of stone is sometimes called seamface.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: 3/4" - 1 1/2"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Gold Tones

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
