

# BRISBANE

## Product Information & Data Sheet

Brisbane is a modern dimensional ledgestone style natural limestone veneer. Each individual piece of stone is 2.25" in height with random lengths and snapped edges. Brisbane shows the split face or interior part of the stone exposed by breaking the sheets of stone with a hydraulic press. Brisbane will naturally show a light sparkle when exposed to sunlight. The thin veneer is initially produced in the same way as a standard countertop; the large blocks of stone are cut into sheets with a 2.25" thickness. Rather than honing and polishing the sheets as you would a countertop, the stone is fed through the hydraulic press and split into strips which are sawn into thin veneer.

### Flats Dimensions

Heights: 1" - 6"

Lengths: 4" - 12"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Grey Tones, Natural Tones

Style: Dimensional

Ledgestone

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
