

WINONA

Product Information & Data Sheet

Winona is a dimensional style natural split face limestone veneer. The stone shows the interior (split face) of natural Wisconsin limestone. Winona has beautiful gray tones with some mineral staining and creates a formal look with natural edges.

Winona is produced slightly differently than our other split face dimensional stones as it is extracted from a layered shelf rock quarry. Instead of the stone being sawn out in large blocks, the slabs used to create Winona are peeled up layer by layer. An excavator pushes its forks between the layers to extract them.

Because Winona comes from a shelf rock quarry, the stone has some occasional mineral staining due to the natural layering of the quarry. Winona and other shelf rock limestones are sometimes referred to as "clean split" which is short for

dimensional clean split limestone. Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
