

MEDINA

Product Information & Data Sheet

Medina is a dimensional style premium natural limestone veneer that shows a blend of the split face and bedface of the stone. The splitface is the interior of the quarried limestone slab, whereas, the bedface is the top and bottom of the stone slab. When walking through the quarry during excavation, both the splitface and bedface are naturally visible. The thin cut veneer strikes a stunning balance of color and texture. Although the different fabrication processes create very different pieces, Medina has a cohesiveness that comes from the pieces' consistent origin. Medina has semi-neutral colors and creates a stately appearance. Pieces with larger 10.5" heights are available upon request for an additional charge.

Flats Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
