

FLORENCE

Product Information & Data Sheet

Florence is a premium thin cut veneer showing all three faces of our natural Wisconsin limestone. The finished veneer blends the interior, tops/bottoms, and edges of the natural shelf rock limestone slabs. Only shelf rock limestone quarries produce these three distinct faces due to the natural layering between the slabs or sheets of stone. When rainwater seeps through the ground it carries minerals and imparts unique colors and characteristics to the stone. The tops and bottoms are cut into larger rectangular pieces with shades of gray and light tan. The edges showcase the tans and earth tones as they have been exposed to the most water from the cracks within the ground. The flat gray pieces come from the interior stone as the rainwater cannot penetrate deep within the slabs.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
