

# COTSWOLDS

## Product Information & Data Sheet

Cotswolds is an old-world tumbled real thin cut limestone veneer. The stone blends multiple faces of the limestone slabs to achieve the different colors and textures of Cotswolds. Cotswolds mixes larger rectangular castle rock pieces with medium ashlar style pieces and a small percentage of legestone pieces. The stone falls loosely into the ashlar pattern with a range of sizes but maintains more linear lines than traditional ashlar stones. Cotswolds is a prime example of the beauty that the tumbling process can add to the stone. Prior to being cut into veneer, the full thickness pieces of stone are put through a drum tumbler where they grind and smash against each other. The tumbling process gives Cotswolds an old weathered appearance.

### Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Gold Tones, Grey

Tones, Natural Tones

Style: Ashlar

Finish: Tumbled

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
