

HAZELTON

Product Information & Data Sheet

Hazelton is a fieldledge style natural thin stone veneer. The stone showcases a blend of the different faces and shapes of our natural Wisconsin limestone. Hazelton has a mix of irregular or mosaic style pieces, interior split face pieces, and weathered edge pieces. The mosaic-style pieces come from the bedface—the tops and bottoms of the stone slabs. The ratios of each type of piece can be altered per customer request. The standard percentages showcase the natural blend that exists in nature. Hazelton has a subtle and pleasing range of colors and textures due to the different faces and cuts of the limestone. The irregular pieces have a sandpaper-like texture, the split face pieces are mostly smooth, and the weathered edge pieces are slightly rippled.

Flats Dimensions

Heights: 2" - 10"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 10"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Fieldledge
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
