

BAILEYS HARBOR

Product Information & Data Sheet

Baileys Harbor is a limited supply Door County natural thin cut limestone veneer. The stone is a rare dark quarried split face that shows exclusively the interior part of the stone slab. The color of the stone is determined by the mineral composition within the ground. The layers of Door County limestone range in color from light to dark. The layers are hand sorted based on color with the lighter layers becoming our Empire product. The very dark pieces that showcase black veining are set aside for Baileys Harbor. Once we have accumulated enough of the dark stone, we do a production run to create the Baileys Harbor product. This product is a very unique and limited supply Door County limestone.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
