

SUNSET POINT

Product Information & Data Sheet

Sunset Point is a natural handpicked fieldstone from Door County, Wisconsin. The stone is collected from centuries-old fence lines all around the Door peninsula. Sunset Point has a stunning natural blend of colors that makes the fieldstone subject to greater variation than a typical quarried stone. The variation comes from the natural weathering of the raw stone over millennia. For example, the stone at the top of the soil that has been exposed to the sun for 100+ years looks vastly different than the stone that has been submerged in mud for that same period. This natural blend of colors is what makes Sunset Point so beautiful and the most popular choice in Door County.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 6"-10"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones, Grey Tones
Style: Cobblestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
