

# TORONTO

## Product Information & Data Sheet

Toronto is a very dark almost black natural thin quartzite veneer in the ashlar style. The stone is loosely considered ashlar but also has larger castle rock style pieces. The larger rectangles come from outer parts of the quartzite slabs, whereas, the longer more linear pieces show the interior or split face of the stone. The larger rectangles will have some slight color variation due to the minerals within the stone and the split face has some deep horizontal veining. The colors of Toronto are about as dark as possible for a natural stone veneer and relatively consistent. Toronto is an imported product that we have in stock and ready to ship.

### Flats Dimensions

Heights: 2" - 8"  
Lengths: 4" - 18"  
Depths: ¾" - 1½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Grey Tones  
Style: Ashlar  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
