

THUNDER BAY

Product Information & Data Sheet

Thunder Bay is a designer-curated natural stone veneer blend that we make in-house. This beautiful blend was created to showcase contrasting colors as well as shapes and stone types. A designer in our local community initially designed the blend to bring a fresh perspective to our local parade of homes. The lighter gray pieces are split face limestone. They fall into the ashlar style as they are linear and medium in size. The darker almost black pieces are quartzite and are larger castle rock style rectangular shapes. Thunder Bay is approximately three-quarters split face limestone and one-quarter black quartzite. These percentages can be adjusted based on customer request.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
