

DURHAM

Product Information & Data Sheet

Durham is a natural quartzite veneer that features a striking blend of grays, golds, dark blues, and earthy browns. The stone creates design flexibility not just due to the range of colors but also the shapes of the individual pieces. Durham can be considered a rough ashlar or fieldledge style depending on how your mason installs the stone. Some natural stone veneers lend themselves to being drystack, whereas, others are more suited for a mortar joint. Durham can be installed drystack or with a mortar joint depending on your design goals. This stone is well suited for both traditional and transitional homes. Durham is in stock in 100 square foot pallets and ready to ship today.
