

HARLECH

Product Information & Data Sheet

Harlech is a natural dolomitic limestone veneer in the ashlar pattern. The thin veneer exclusively shows the split face or interior part of the natural limestone slabs that have been broken or snapped with a hydraulic press. Harlech is a testament to the variation that can naturally occur within a single quarry. The limestone used to create Harlech showcases beautiful variation and surprisingly all comes from the same quarry. One side of the quarry produces the gray tones, whereas, the other side produces the beige tones. To create Harlech, we mix the two colors in a 50/50 blend. The ratio of colors can be adjusted to fit your design needs.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
