

TRIBECA

Product Information & Data Sheet

Tribeca is a dimensional or sawed height style real dolomitic limestone thin veneer. The stone has rare and unusual dark tones. Tribeca is quarried within a specific vein of the quarry containing a greater concentration of manganese and zinc. The minerals settled between the layers of limestone which give Tribeca the darker black tones. The standard Tribeca encompasses both the bedfaces (black and white pieces) and split faces (beige pieces with more solid color). If desired, the blend can be adjusted to all bedface or all split face pieces depending on your design goals. Because Tribeca is quarried within only one specific vein, this stone may have a longer lead time.

Flats Dimensions

Heights: 2- $\frac{1}{4}$ " , 5" , 7- $\frac{3}{4}$ "
Lengths: 4" - 16"
Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2- $\frac{1}{4}$ " , 5" , 7- $\frac{3}{4}$ "
Lengths: 3"-5" x 8"-12"
Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
