

CANNON BEACH

Product Information & Data Sheet

Cannon Beach is a natural sandstone in a mosaic pattern with a tumbled finish. This type of sandstone is referred to as bluestone within the industry due to the blueish tones found within the stone. Cannon Beach has a soft color range of greys, light blues, and occasional purple hues. The individual pieces of stone have an unusually soft texture even for a tumbled stone. This thin veneer is not sawed but rather split on the back due to the extremely well and consistent layering of the quarry. The split back will have no impact on the installation or final appearance. Cannon Beach has larger pieces that are great for large-scale projects. Due to the larger pieces, the thickness is closer to 1.5" and architecturally approved for any structurally sound wall.

Flats Dimensions

Heights: 4" - 12"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Grey Tones, Sky Tones

Style: Mosaic

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
