

ALEXANDRIA

Product Information & Data Sheet

Alexandria is a low-height ledgerstone natural granite thin veneer. The stones range from approximately 1" to 5" in height and have a unique speckled appearance with a naturally rough texture. Alexandria showcases the interior part of the stone which has been split with a hydraulic press. The colors vary from whites and tans to the occasional brown. This stone complements both rustic and contemporary aesthetics.

Alexandria is typically installed in a linear pattern. The stone can be installed with the standard half-inch mortar joint (shown) or the pieces can be drystack (tight fit installation). With a drystack installation, you can expect both the mason's cost and waste factor (due to fitting the stones together) to increase substantially.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Ledgerstone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
