

ANDOVER

Product Information & Data Sheet

Andover is a dimensional bluestone natural thin veneer with consistent sawn heights of 5.5". The stone has been hand-rockfaced or pitched. The rock face is done by hand using a chisel and makes the stone very lightly bow out. This process adds depth of texture and unique character to the pieces of stone.

This style of dimensional stone is also referred to as running bond, strip, or course heights. The finished wall will have consistent lines or rows running through it similar to brick due to the consistent heights of the pieces. A drystack, tight fit, or mortarless installation can be done without any alterations. This a split-back product and has not been sawn on the back with a diamond blade. The split back will have no impact on the installation or final appearance.

Flats Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Earthy Browns, Grey Tones, Sky Tones
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
