

AVONDALE

Product Information & Data Sheet

Avondale is a colorful blend of real thin cut limestone veneer. This natural stone is unique in that the pieces of stone showcase a large color variation but all come from the same quarry. Avondale's unique color variation comes from using different parts of the quarried slabs of natural stone.

The quarry is naturally layered and the stone slabs or sheets are peeled up by pushing a wedge between the layers. The sheets vary in size with the largest being roughly 12' x 2' with a thickness ranging from 1"-12". The outer portion of the sheets of stone are colorful due to the rainwater washing in minerals over millennia. The interior portion is the grey unadulterated limestone. We use hydraulic presses to process the slabs and expose the inner part of the limestone.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones, Grey Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
