

# APPALACHIAN LEDGE

## Product Information & Data Sheet

Appalachian Ledge is a dimensional ledgestone natural thin stone veneer with a beautiful range of sparkling colors including silver, copper, and bronze. The stone pieces have a sawn top and bottom and are cut to three specified heights. Appalachian Ledge is unique as it is one of the few dimensional ledgestones that uses a mortar joint. It is not intended for a drystack, tightfit, or mortarless installation.

Appalachian Ledge is most commonly used on smaller scale walls due to the shorter heights of the pieces and is shown with a standard half-inch grey raked mortar joint. 90-degree corners are not available for this product. For the corners, the flat pieces can be installed in an overlapping and interlocking pattern. Appalachian Ledge is a closeout product with 600 square feet available.

### Flats Dimensions

Heights: 1" - 6"

Lengths: 4" - 12"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Earthy Browns, Natural Tones

Style: Dimensional Ledgestone

Finish: Natural

### Packaging

Sold as loose pieces.

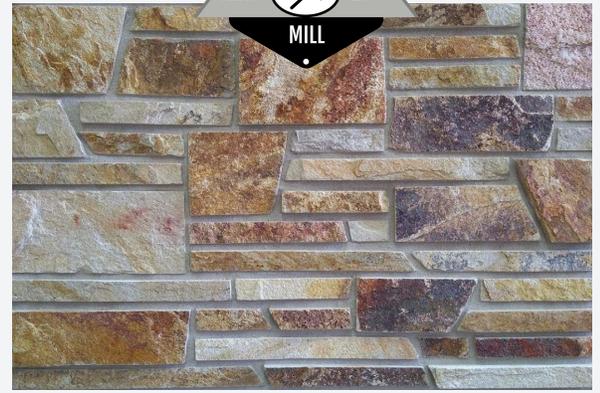

Flat Pallet: 150 square feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
