

BUCKSKIN

Product Information & Data Sheet

Buckskin natural thin veneer is an ashlar pattern stone in the full range of earth tones. The thin veneer is cut from sheets of natural sandstone. The sheets or layers of stone are unearthed from the quarry then split into the rectangular pieces using a hydraulic press. Buckskin is 100% bedface or natural bed as it is sometimes called. It consists of the top and bottom layers of stone. For example, if you were to walk across the quarry where it is flat you would be walking across the bed. Minerals seep in between the layers of stone and are carried by rainwater which causes the unique color variations in Buckskin.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
