AVALON Product Information & Data Sheet

Avalon is a low-height bluestone natural thin veneer with a tumbled finish. The stone primarily showcases shades of grey, soft blue, and gunmetal with an occasional lavender or lilac-colored piece. The pieces of Avalon have a natural top and bottom and are not sawn to specified heights.

Avalon's texture is about as silky smooth as you can get with a real stone veneer. The edges are rounded more than most of our tumbled natural stone options. This style comes from the smaller pieces of stone being finished in a vibratory tumbler with fine gravel. In contrast, our other tumbled natural stone veneer options are processed in a drum tumbler where the pieces rub and grind against each other.

LEED[®] Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

Heights: 1" - 5"

Colors: Copper Tones, Natural Tones, Sky	Sold as loose pieces.
Tones	Flat Pallet: 150 square feet
Style: Ledgestone	Corner Pallet: 50 linear feet
Finish: Tumbled	

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
