CHESAPEAKE

Product Information & Data Sheet

Chesapeake natural stone veneer provides a rustic New England feel in a ledgestone style. The colors consist of beiges, blacks, blues and shades of grey. Chesapeake has naturally rough and rugged textures well suited for exterior applications. The individual pieces range in height from approximately 1"-5" and are laid in a linear pattern for a contemporary look. Chesapeake can be installed with the standard half inch mortar joint (shown) or the pieces can be drystacked (tight fit installation). With a drystack installation you can expect both the mason's cost and waste factor (due to fitting the stones together) to increase substantially.

LEED[®] Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
