

COASTLINE

Product Information & Data Sheet

Coastline is a natural New England cobblestone. The pieces of natural stone veneer come in various colors, shapes and sizes. Coastline has a weathered and naturally rough texture with mainly earth tones. This thin stone veneer is a great fit on lake houses or coastal homes. Stones of this style can also be referred to as boulders or round side out stone. Coastline is unique because it is not a quarried stone by rather a natural fieldstone. Cobblestones can be used for both interior and exterior applications and are well suited for both large and small projects. For masons who are comfortable with and have experience installing cobblestones, they typically go quickly and have a medium to low installation cost.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 6"-10"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Natural Tones
Style: Cobblestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
