

BELLEVUE

Product Information & Data Sheet

Bellevue is an ashlar-style machine-cut limestone natural thin veneer. The thin stone is cut from premium Wisconsin limestone that has stood the test of time with its high strength and low water absorption. The stone showcases the inner part of the natural limestone that has been cut with a hydraulic press.

Bellevue is a three-way blend of colors consisting of buff, lavender, and soft blue. The stone is colorful upon close inspection, but it appears more neutral and monochromatic from a distance. Bellevue's popularity can be attributed to the unique color variation of the stone and a subtle overall appearance.
