

BERKSHIRE

Product Information & Data Sheet

Berkshire is a thin stone veneer in the classic ashlar style. The stone is a mix of warm tan and earthy brown tones. Berkshire's assortment of colors comes from the variation inherent to natural stone and the different faces of the stone. The finished thin veneer is a blend of bedface and split-face. Bedface is the outer or exposed part of the stone with more color due to mineral staining. Split-face is the interior part of the stone with more consistent colors; the split-face pieces are made using a hydraulic press to break the stone. Although the pieces of Berkshire are different faces of the stone, they complement each other and make for a beautiful finished wall.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Earthy Browns

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
