

BILTMORE

Product Information & Data Sheet

Biltmore is a tumbled castle rock style natural thin stone veneer. The stone showcases large blocky pieces of sandstone with beautiful, earthy brown tones and a soft, tumbled finish.

Biltmore starts as natural sandstone sheets quarried in the USA. The sheets or slabs of stone are fed into a hydraulic press where a craftsman splits them into usable rectangular blocks. The blocks of stone are fed into a tumbler; the tumbler somewhat resembles and works like a large cement mixer. As the pieces of stone tumble and bash into each other, the sharp edges are worn off. This process gives the stone a much more worn, softer, and older appearance. The outer faces of the tumbled blocks are sawn off to create the thin stone veneer and finish Biltmore.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Castle Rock
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
