

BRENTWOOD DIMENSIONAL

Product Information & Data Sheet

Brentwood Dimensional is a sawn height version of our standard Brentwood real stone veneer. The sawn heights add a formal element to this natural stone veneer. Brentwood Dimensional has unique wood like veining on the individual pieces of stone. This natural high-density sandstone is subject to heavy variation. Some stone pieces have heavy and pronounced swirling grains whereas other pieces have none. The natural blend of swirling grains or wood like veining on the pieces of stone is in the same proportion as it naturally occurs in the ground. This beautiful stone is eye-catching and a conversation starter. It complements natural exposed wood and rustic designs.
