BRENTWOOD DIMENSIONAL
Product Information & Data Sheet

Brentwood Dimensional is a sawn height version of our standard Brentwood real stone veneer. The sawn heights add a formal element to this natural stone veneer. Brentwood Dimensional features unique wood-like veining on the individual pieces of stone.

This natural high-density sandstone is subject to heavy variation. Some stone pieces have heavy and pronounced swirling grains, whereas other pieces have none. The natural blend of swirling grains or wood-like veining on the stone pieces reflects the same proportion as it naturally occurs in the ground. Brentwood Dimensional complements natural exposed wood and rustic designs.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

Lengths: 4″ – 16″
Depths: ¾″ – 1-½″
Weight: 13 – 15 lb. per square foot

Corner Dimensions

Heights: 2-¼″, 5″, 7-¾″
Lengths: 3″–5″ x 8″–12″
Depths: ¾″ – 1-½″
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
