

# BRENTWOOD DIMENSIONAL

## Product Information & Data Sheet

Brentwood Dimensional is a sawn height version of our standard Brentwood real stone veneer. The sawn heights add a formal element to this natural stone veneer. Brentwood Dimensional features unique wood-like veining on the individual pieces of stone.

This natural high-density sandstone is subject to heavy variation. Some stone pieces have heavy and pronounced swirling grains, whereas other pieces have none. The natural blend of swirling grains or wood-like veining on the stone pieces reflects the same proportion as it naturally occurs in the ground.

Brentwood Dimensional complements natural exposed wood and rustic designs.
