

# CABERNET

## Product Information & Data Sheet

Cabernet is a tumbled real stone veneer in shades of earthy browns. The stone has unusually rich and deep tones of brown, gold, and some rust tones. We classify Cabernet as a fieldledge style as it has some semi-irregular pieces. Depending on your design preferences and masonry contractor, the stone can be installed in a more linear ashlar style pattern.

This thin stone has a relatively smooth texture with occasional ripples on the faces of the individual pieces. The stone is shown here with a half-inch raked mortar joint, but Cabernet is also well-suited for a flush joint.

---

### Flats Dimensions

Heights: 2" - 10"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 10"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Earthy Browns  
Style: Fieldledge  
Finish: Tumbled

### Packaging

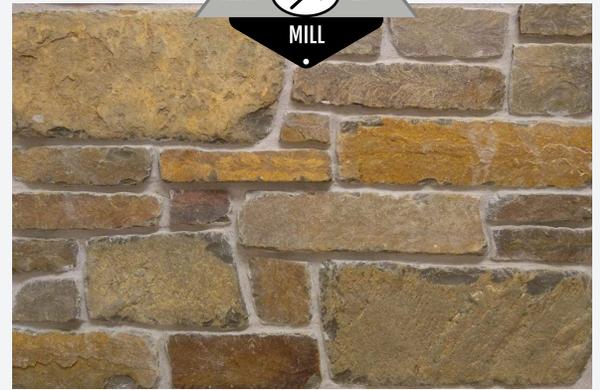

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
