

DAKOTA

Product Information & Data Sheet

Dakota is a natural hand-picked fieldstone thin veneer in an ashlar pattern. The stone was created out of demand for a strip-like product with the earthy brown tones and natural beauty of fieldstone. The individual pieces of thin stone are all semi-consistent with only small variations in height. This consistency allows your mason to lay a course or row of all the same height pieces of stone. The courses or rows give the appearance that there are strips of stone running across the wall. This type of installation is quicker than most other patterns and can help reduce costs.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
