

RAVENNA

Product Information & Data Sheet

Ravenna is a colorful and bold natural thin limestone veneer. The pieces have been sawed to specified heights creating dimensional cut veneer. The process to create dimensional cut stone is very neat. The natural stone is peeled up in sheets that range in size but are on average 8'x8' and four inches thick. The large sheets are moved to the sawing table where a computer guided saw goes back and forth over individual sheets with a diamond blade to cut them into strips. The blade makes a complete cut through the slab and then moves over exactly 2.25" to make another cut. The blade continues to cut at intervals of 5" and 7.75" before repeating. This sawing process is how Ravenna gets its set heights. The strips are fed into the tumbler before being sawn into thin veneer.

Flats Dimensions

Heights: 2-1/4", 5", 7-3/4"

Lengths: 4" - 16"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2-1/4", 5", 7-3/4"

Lengths: 3"-5" x 8"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones, Gold Tones, Grey Tones

Style: Dimensional

Finish: Tumbled

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
